Next-Generation 9-1-1 demands that your PSAP respond to “calls” containing new types of data. Are you up to the challenge?

Verint® Systems can help.

Organizations around the world rely on our video intelligence, public safety, and intelligence and investigative communications solutions to capture, analyze, and make decisions based on input from multiple information sources, including traditional, wireless, radio, and IP calls; photos; text; videos; maps; TTY; and other data.

Learn more about Verint — and discover how our innovative solutions can help your PSAP meet the challenges of Next-Generation 9-1-1.
